This 2-day, 16 hour **I-CAR** recognized (3 pts) course is to make the experienced or new technician more efficient in diagnosis, measuring, and repair of collision damaged vehicles using Car-O-Liner computerized measuring systems.

Key topics:

- Gain information of current and future vehicle designs and processes.
- Be better able to identify damage and plan the corrective repairs with a complete understanding of Collision Damage Characteristics.
- Better data interpretation will allow the productive usage of the clamping and measuring system.
- Measuring abilities will be greatly enhanced by the 'hands on' activities.
- Obtain procedures and confidence to diagnose problems related to suspension.
- Frame mounting and repair will become more efficient and timely following the "hands on" training assignments.

These classes will be held at the **PFC Training Center** in Roseville, California.

All classes will include full frame clamping and support system topics along with other critical information necessary for the most productive use of Car-O-Liner equipment.

Registration forms (attached) MUST be received by mail or fax no later than two weeks before the session you wish to attend.

If you have purchased a Car-O-Tronic system within the past 12 months, please check with Maggi as two of your technicians may qualify to attend any of these classes for free!
