CAR-O-LINER®

DEMOS AVAILABLE

PFC offers Car-O-Liner's advanced collision repair equipment, trusted for over 50 years.

Automatic Spot Welder

-Boost productivity with the double rotating C-tong handle.
-Reduce strain with the ergo-grip handle in any position.
-Work quickly with the lightweight transformer gun.
-Adjust freely with the telescopic support arm.
-Ensure proper welds with automatic settings.
-Achieve powerful output with 16,000 amps.
-Enhance safety with the compact design and low center of gravity.
-Follow easily with the LED control panel.

Double Pulse MIG / MAG Welder

-Control precisely with double pulse, reducing spatter.
-Feed wire stably with the four-roll system.
-Ensure precise feeding with tacho control.
-Change wire easily with the LED light.
-Navigate intuitively with the soft-key panel.
-Adjust arcs precisely with the arc adjust function.
-Update software via SD card.
-Store welding data on an SD card for compliance.

Advance Dent Repair Workstation

-Switch quickly between two dedicated guns, meeting aluminum and steel welding needs without extra equipment.

-Reduce repair time by up to 40 percent with no need for panel disassembly, lowering spare parts orders.

-Minimize welding to decrease the chance of altering panels through heat or burn-through, reducing the risk of compromised corrosion protection.
